Art Unit: 1614

#### **DETAILED ACTION**

### Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-31, drawn to a method of treating Huntington's disease comprising a compound of formula (I) wherein the X moiety is linked to formula (I) through a S.

Group II, claim(s) 1-31, drawn to a method of treating Huntington's disease comprising a compound of formula (I) wherein the X moiety is linked to formula (I) through a O.

Group III, claim(s) 1-31, drawn to a method of treating Huntington's disease comprising a compound of formula (I) wherein the X moiety is linked to formula (I) through a N.

Group IV, claim(s) 32, drawn to a pharmaceutical composition comprising a NAALADase inhibitor.

Group V, claim(s) 33, drawn to a method of making a pharmaceutical composition comprising a NAALADase inhibitor.

Groups I-V are not so linked as to form a single general inventive concept under PCT Rule 13.1 because there is a lack of unity between the inventions. See US Patent No. 5,985,855 to Slusher et al. which teaches the use of NAALADase inhibitors to treat Huntington's disease (see col 7 line 55).

Art Unit: 1614

## Election of Species

Regardless of which Group Applicant elects, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Specifically, applicant is required to define each of R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup>, R<sup>4</sup>, R<sup>5</sup>, R<sup>6</sup>, R<sup>7</sup>, R<sup>8</sup>, X, B, A, m and n and any additional variables as required for a particular species. Currently, claim 3 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Application/Control Number: 10/500,323

Art Unit: 1614

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

## Election/Restrictions Proper

MPEP §809.02(d) states "[w]here only generic claims are presented, no restriction can be required except in those applications where the generic claims recite such a multiplicity of species that an unduly extensive and burdensome search is necessary." Here, the claims recited such a multiplicity of species that an unduly extensive and burdensome search would be necessary if all of the claimed species were to be examined simultaneously. Also, because of the sheer number of possible combinations encompassed by the present claims, consideration of all would significantly compromise the Examiner's ability to conduct a quality examination of the present application.

The present claims are directed to a method of treating Huntington's diseases comprising administering a NAALADase inhibitor. Present claim 3 for example provides a variety of possibilities for R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup>, R<sup>4</sup>, R<sup>5</sup>, R<sup>6</sup>, R<sup>7</sup>, R<sup>8</sup>, X, B, A, m and n. For hypothetical exemplification purposes only, if each of the variables above were each limited to 10 possible moieties there would be 10<sup>13</sup> possible species of compounds to be searched.

Further, as shown by the following classifications, a majority of the combinations encompassed by the present claims has acquired a separate status in the art. For example, if Ar a 7 membered ring containing one N it is classified in class 514 subclass 212.01 whereas if Ar is a 6 membered ring containing one N it is classified in class 514

Application/Control Number: 10/500,323

Art Unit: 1614

subclass 222.2. Notwithstanding that the classification of some of the active agents is

co-extensive, all of the claimed compounds are patently distinct and fully capable of

supporting separate patents.

For the above reasons, an election of a single disclosed species for examination

Page 5

purposes is deemed necessary and proper.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Examiner Graffeo whose telephone number is 571-272-

8505. The examiner can normally be reached on 9am to 5:30pm Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Christopher Low can be reached on 571-272-0951. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
